## ACCELERATOR FREE LATEX FORMULATIONS, METHODS OF MAKING SAME AND ARTICLES MADE FROM SAME

5

## ABSTRACT OF THE INVENTION

making natural or synthetic latex articles without the use of

accelerators, thiurams or carbamates. The method includes making an elastomeric material by mixing a base polymer containing carboxylate groups with a carboxylic acid or derivative thereof, a divalent or trivalent metal, an amine or amino compound, and a neutralizing agent. The elastomeric material is formed into a latex

article. The present invention is also directed to a latex article made according to this method. The latex article does not contain
